Re: Securities America

Mark,

In an effort to give credit where credit is due, Enterprise Precast would like to thank REMCON for its dedication and determination in erecting the Precast panels on the Securities America project. The Precast installation was completed in just 6 days, two days ahead of schedule. I also appreciate your crew taking care of the precast panels, mostly erected in windy conditions. Your operation was completed in a safe and professional manner.

Please pass on to Steve Hartman and his crew our sincere appreciation for all the work they did on the project, and congratulations also to REMCON on becoming a PCI Qualified Erector.

Very truly yours,
Enterprise Precast Concrete, Inc.

John Arehart
General Manager
